

Data Structures & Algorithms

Fall 2022

Assignment # 3

CLO-3

Submission Deadline: 3rd June 2022

This assignment will test your programming and logical skills.

Statement:

You are going to make a system to store data of students for DSA course. Implement a linked list that should have the ability to save the data of N number of students.

1. Store the data according to your choice. (Insert at Head/ Tail etc)
2. Your System should provide additional features like Display the Name of Student having Minimum and Maximum score in DSA course.
3. Display the linked List in reverse order

Guidelines:

1. You have to submit the assignment in Soft Form at LMS, having code and multiple screenshots of your outputs covering different scenarios.
2. Make your code unique.
3. You can implement in any programming language of your choice.
